QA Engineer

Summary

I graduated from the "Software Tester" course because I want to develop among smart and interesting people in a promising field. For 13 years, I worked as a structural unit manager. Among other things, I was engaged in the implementation of automation of accounting and, the development and maintenance of software. I have experience in organizing remote work at an enterprise with over 40 employees. I will benefit the company and society thanks to the following skills: hardworking, able to work in a team, result-oriented, quickly learn everything new, communicative, able to work on mistakes.
